

## Enabling Pop-ups in Moodle

In order to take some tests and to make full use of the Moodle Messaging system, you should enable Pop-Ups for the Moodle site. Most browsers will have an automatic pop-up blocker, and there may be additional ones built into add-ons like the Google or Yahoo toolbars. You may need to enable popups in more than one place to ensure you receive your messages instantly. Instructions are given on the following pages for Internet Explorer version 9 & Firefox version 14. You may need to look around a bit to locate the Popup controls for other browsers or add-ins, though the process should be similar.

### Internet Explorer

1. Open Internet Explorer, select the Tools button, and then select Internet options.
2. On the Privacy tab, under Pop-up Blocker, select or clear the Turn on Pop-up Blocker check box, and then select OK.

### Chrome

1. On your computer, open Chrome.
2. Go to a page where pop-ups are blocked.
3. In the address bar, click Pop-up blocked.
4. Click the link for the pop-up you want to see.
5. To always see pop-ups for the site, select Always allow pop-ups from [site].

### Firefox

1. Open the browser.
2. Click the "hamburger" menu icon (top right) to open the Firefox menu.
3. Click Options.
4. Click the Content icon located at the top of the window.
5. Make sure that Block pop-up windows is activated (checkbox).
6. Click the Exceptions button located to the right of Block pop-up windows.
